Training: Occupational Safety and Health within the Context of COVID-19

The PSA believes in the empowerment of members hence the decision to offer training on Occupational Safety and Health, within the context of COVID-19. Members will recall the emergence of the COVID-19 pandemic necessitated the change in the workplace such as social distancing, disinfection of the workplaces, establishment of steering committees, remote work, and provision of sanitisers in the workplace.

The PSA saw it fit to ensure that individual members and shop stewards, serving in Steering Committees, are empowered to enable them to be aware of their rights and protect the same.
