What's happening in SITA

Restructuring of the Micro-structure

As members are aware, the employer has embarked on a restructuring process as reported in the previous *Informus*.

The draft structure is not yet ready for consultation at the bargaining forum. Members were requested in a previous *informus* to provide inputs on the migration and placements framework but, members complained that they did not receive it. The PSA conducted an investigation and it was established that the *Informus* was blocked by the employer's IT System, due to the size of the attachments. The PSA forwarded the *Informus* to Provincial Chairpersons to circulate to members for inputs. The PSA also engaged with the employer to address this matter who then sent a *communiqué* via the corporate structures to members to provide inputs. The PSA wishes to thank all members who provided inputs on the migration and placements framework.

The PSA will make sure that employee's jobs are protected

Members will be informed of developments.
