BARGAINING COUNCIL (PHSDSBC)

15-02-2021

Feedback: COVID-19 psycho-social support task team

A task team was formed as a monitoring tool for the provision of trauma counselling for healthcare workers who suffer from depression and anxiety caused by the COVID-19 pandemic. A task team meeting was convened on 15 February 2021. Parties agreed to establish a comprehensive template that will be used to assess and monitor the counselling support services provided at various health institutions and the impact thereof.

The PSA requests that PSA Provincial Structures submit reports on which health institutions provide counselling support services in this regard and those that do not to allow the Council to intervene. Kindly submit this information to the PSA Chief Negotiator at peter.mngomezulu@psa.co.za by **24 February 2021**.

The PSA wants to take this opportunity to wish all employees who are affected or infected by COVID-19 a safe and speedy recovery and submit heartfelt condolences for employees who passed on because of the pandemic.
