12-01-2024

Feedback: Free State Health and Safety Committee

On 9 January 2024, the Free State Department of Health established a Provincial Health and Safety Committee. This Committee will monitor the effectiveness of other Health and Safety Committees within institutions and facilities in the Free State Department of Health.

The Committee includes two representatives from the PSA, *i.e.*, Mr Seiso Motlahale and Ms Lizzy Mashelela. If there is any non-compliance with health and safety issues, they can be contacted directly or through the PSA Provincial Office.

Mr Seiso Motlahale: 066 301 9164 / shardrack.motlahale@psa2ftss.co.za

Ms Lizzy Mashelela: Melesilizzy@gmail.com

The PSA used the opportunity to address the ongoing water crisis and the absence of contingency plans in health facilities. The Committee has raised the issue with the Free State Department of Health's Executive Committee and sent urgent letters to the Director of Infrastructure and Medical Services in the Free State Department of Health, requesting compliance.

The PSA also took the opportunity to raise the current water crisis and the lack of contingency plans at health facilities. The Committee has escalated the matter to the Free State Department of Health's Executive Committee. It has also written urgent letters to request compliance from the Director of Infrastructure and Medical Services of the Free State Department of Health.

Members will be updated on progress.
