Black Friday: Tips from GetBucks

29 November is around the corner and shoppers are getting ready to shop! Here are some tips to make the most this Black Friday:

Do research and find the best deals

Now's the time to start looking around! Most major retailers across the country already have deals on the go, so get searching and start pricing. Ask yourself though: **Do I need it?** With the festive season around the corner, saving should be a priority. But, if what you need is there for the taking, make sure to search online daily for the best deal for it.

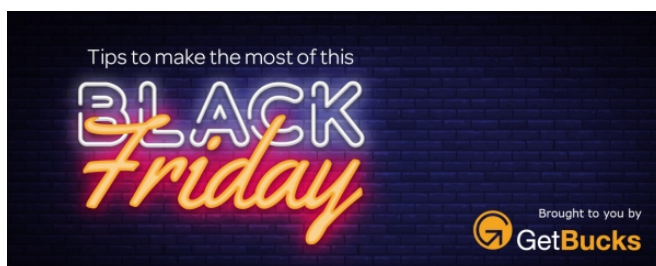

Going in store is so old school. Shop online and get your goods delivered to you

With innovative technology that will see some retailers redefine how we shop this Black Friday, it may be worth your time, money (and even sanity) to shop online. Save the trip to the chaotic shops and rather shop from the comfort of your home.

Pace yourself - the day is longer than you think!

With many Black Friday deals starting earlier and finishing later, there is more than enough time to get what you need without rushing around in a sweat.

The most important tip is don't spend more than what you can afford!
