

# INFORMUS

FOR PSA MEMBERS: DEPARTMENT OF HEALTH – WESTERN CAPE

16-04-2020

## Update: COVID-19

The employer and labour are engaging on a weekly basis to address COVID-19 challenges. Parties had the multilateral meeting on 14 April 2020 where the employer informed labour that it is busy securing cloth masks for all staff. The employer could not commit itself to a timeframe within which these masks will be available owing to procurement processes that must be adhered to. The PSA welcomed the initiative and will monitor the process.

The employer has also agreed to conduct a COVID-19 related workshop on 16 April 2020 with labour. The aim of the workshop is to ensure that both parties are on the same page in terms of the Department's strategic and operational plans on the way forward.

Members are reminded that they must keep participating in the IMLC meetings being held and utilise the Department's Dedicated People Management COVID-19 Helpdesk to address COVID -9 workplace concerns.
